Libraesva ESG – Email Security Gateway

Today's email threats move fast, and malicious files look more and more like ordinary files. Growing businesses need predictive email security defeating today's threats with an eye on tomorrow.

Libraesva ESG manages and filters all email traffic to protect organizations from email-borne threats and data leaks.

Using two proprietary sandboxing technologies, **URLsand** and **QuickSand**, Libraesva ESG intelligently scans all links and documents for active code and evasive behavior to prevent users from visiting unsafe links or receiving and opening malicious files.

Simple and easy to deploy configurations guarantee that customized email protection is in place in a matter of minutes. Available both **On Premise** or **Cloud**. We are Email Security Experts!

Libraesva ESG Main Features

SPOOFING PROTECTION
Using a combination of SPF, DKIM and DMARC athentication techniques and email header analysis Libraesva ESG allows you to identify and block the imposters.

PROTECTION AGAINST MALICIOUS FILES
Prevention against the delivery of malicious attachments through deep inspection and document sanitization.

PROTECTION AGAINST MALICIOUS URLS
Libraesva ESG includes time-of-click protection that intelligently scans all links for evasive behavior to prevent users from visiting unsafe websites.

BEC AND IMPERSONATION ATTACKS PROTECTION
Libraesva ESG protects against impersonation attacks, such as BEC, CEO Fraud and Whaling.

RESPOND QUICKLY TO SECURITY THREATS
Act on deep visibility into targeted threats and advanced attacks with detailed reporting on every email. Easily integrate with third-party SIEMs and other applications.

THREAT ANALYSIS PORTAL
A Threat Intelligence Dashboard, which offers analysis and trend data on attacks targeting your organization. Benchmark against Libraesva global data.

THREAT REMEDIATION
Libraesva ESG allows to remove emails from user inboxes after they have been received, through a powerful email remediation feature.

EMAIL ENCRYPTION
Sensitive data, information, documents and files can be sent securely on demand through the Libraesva ESG end to end encryption service.

EMAIL CONTINUITY
Email continuity ensures zero downtime against any planned or inplanned downtime to your mail server or Office365.

MANAGE YOUR EMAIL ON THE GO VIA MOBILE
Libraesva ESG includes a suite of mobile applications extending management of email and the quarantine on the go.

Our Proprietary Leading Technology

ADAPTIVE TRUST ENGINE
A dynamic relationship tracking engine for senders and recipients, so all transactions are tracked and monitored to measure trust and to observe who usually communicates within your organisation.
